ABOUT US

Welcome to Refresh Packaging!

We're passionate about what we do, and the reasons we do it. We want all packaging to be compostable, and to keep on giving at the end of its life, when it degrades from its packaging form back into nutrient-rich compost, ready to support the cycle of growth again. Our products undergo testing that enables us to proudly bear their compostable certifications from organizations such as the Biodegradable Products Institute.

At Refresh Packaging we bring quality compostable products right to your door. We're here to help not only bring you the best compostable products but help educate your customers on the benefits of composting. We tackle social media, podcasting, governmental relations, composting partnerships and more!

We offer many types of products, from bags to rigid and flexible packaging. This bag catalogue showcases the most popular sizes of each bag type, but don't feel pressured to fit the mold. Once a minimum order quantity is reached (listed under each style), bags sizes and printing are both customizable. All prices are in USD.
