FLEXIBLE PACKAGING

2023 FLEXIBLE PACKAGING

ABOUT US

Welcome to Refresh Packaging!

We're passionate about what we do, and the reasons we do it. We want all packaging to be compostable, and to keep on giving at the end of its life, when it degrades from its packaging form back into nutrient-rich compost, ready to support the cycle of growth again. Our products undergo testing that enables us to proudly bear their compostable certifications from organizations such as the Biodegradable Products Institute.

FOR COLLECTION IN MUNICIPAL PROGRAMS, WHERE APPROVED.
POUR LA COLLECTE DANS LES PROGRAMMES MUNICIPAUX, OÙ APPROUVÉS. CERT #10628973

At Refresh Packaging we bring quality compostable products right to your door. We're here to help not only bring you the best compostable products but help educate your customers on the benefits of composting. We tackle social media, podcasting, governmental relations, composting partnerships and more!

We offer many types of products, from bags to rigid and flexible packaging. This Flexible Packaging catalogue showcases the most popular products, but if you're looking for something different, just let us know. Once a minimum order quantity is reached (listed under each style), printing is customizable. **For higher volume clients, we also offer roll stock for in-line packaging systems.** All prices are in USD.

2023 FLEXIBLE PACKAGING

ABOUT US

All of our flexible packaging products require a minimum order quantity (MOQ) to purchase them. To serve our higher volume clients better, we also offer **compostable roll stock for in-line packaging systems**.

Prices would apply to total volume, all in USD. This compostable packaging rollstock is certified through the Biodegradable Products Institute (BPI) and meets specifications for ASTM D6400 or ASTM D6868, the globally recognized biodegradation test standard.

Potential applications for our rollstock might include packaging for:

- Dry goods such as chips and snack bars
- Powders such as soaps/detergents
- Pet treats or food
- Thermal management packs
- Dietary supplements

INDUSTRY APPLICATIONS:

Dry Goods

Pet Food

Powders

All components are fully biodegradable and compostable. They break down into healthy compost leaving no microplastics and conform to major compost certifications including (BPI) and meets specifications for ASTM D6400 or ASTM D6868.
